Press Release on Enhanced Audit Clearance System

The Royal Audit Authority (RAA) is pleased to announce the official launch of the enhanced Audit Clearance System, marking a significant step in enhancing service delivery and user experience. As a part of its commitment to deliver efficient services to users, it was felt necessary to enhance the existing Audit Information Management System (AIMS), with a focus on simplifying and streamlining the audit clearance module as the system is widely used by all public officials who require audit clearance for purposes such as training, workshop, promotion, election, and retirement benefits.

The enhanced system addresses challenges encountered in the earlier version and introduces a range of user-focused features aimed at simplifying procedures and strengthening institutional responsiveness. The system was developed in-house, using internal expertise.

Key Features of the Enhanced System:

1. *A streamlined Application Flow:* A simple and step-by-step process with progressive guidance and a final confirmation for ease of submission.
2. *Simplified Application Structure:* Consolidated applicant types and purposes for improved clarity and ease of use.
3. *Application Tracking and Reapplication Options:* Applicants can now track clearance status at each verification stage and conveniently reapply using the same form if necessary.
4. *Streamlined information requirements*

The enhanced audit clearance system is now accessible at <https://aims.bhutanaudit.gov.bt/> and a simple step-by-step guide is also available on the landing page for easy navigation.
